

Hexagon Asset Lifecycle Intelligence division helps clients design, construct, and operate more profitable, safe, and sustainable industrial facilities. We empower customers to unlock data, accelerate industrial project modernization and digital maturity, increase productivity, and move the sustainability needle.

Our technologies help produce actionable insights that enable better decision-making and intelligence across the asset lifecycle of industrial projects, leading to improvements in safety, quality, efficiency, and productivity, which contribute to Economic and Environmental Sustainability.

We would be honoured and pleased to be part of techno-galaxy event to showcase our digital solutions in operations & maintenance side.

- AcceleratorKMS
- HxGN EAM
- PAS Cyber Integrity

AcceleratorKMS is industry leading top-of-the-line procedure lifecycle management solution that aims to mitigate incidents resulting from incorrect information and enhance human performance, while learning in the flow of work. It enables energy companies like NTPC to operate safer, reliable, more efficient in-field operations by digitizing their in-field procedural content.

HxGN EAM is an industry-leading asset management solution designed to extend asset lifecycles and improve productivity. With over 30 years of experience and continuous innovation, HxGN EAM empowers organizations to evolve from EAM to Asset Performance Management (APM). Its wide range of risk, condition, and reliability-based maintenance instruments, and applied technologies like AI and ML can deliver accurate, trusted data and strategic insights to drive better decision-making while ensuring policy compliance.

HxGN EAM's cloud-native foundation, device-independent work orders, and GIS or BIM capabilities enable organizations to access vital information when and where they need it. The solution's core modules offer specialized support to meet organizations' unique requirements, including asset management, asset performance management, work management, materials management, procurement management, budget management, inspection management, project management, and compatible units. HxGN EAM offers Asset Investment Planning capabilities to help organizations optimize investment planning to make the right investments in the right assets at the right time. The HxGN EAM Digital Work mobile app provides field technicians with real-time access to asset registry information, work orders, and inventory management. HxGN EAM delivers extremely reliable uptime, and the flexibility and scalability to enable organizations to easily grow as their requirements evolve.

PAS Cyber Integrity is OT/ICS cyber risk management solution with deep visibility on asset inventory, risk based vulnerability management and configuration change management. Our vendor agnostic solution can help you in having ICS configuration from multi-vendor OT assets to provide you insights on control logics, configurations data, IO cards, hardware, software & firmware details in each industrial control system at various NTPC sites across India.
